Warning: Undefined variable ShasAttributeValueDescription in C:\www.root\mirror.dimablo.com\wp-content\plugins\woocommerce-print-products\public\class-woocommerce-print-products-public.php on line 2806 bMC465 Clone ID

CD191; CKR-1; CKR1; CMKBR1; HM145; MIP1aR; SCYAR1 Synonyme

Host Species Rabbit

Anti-CCR1 antibody(DMC465); IgG1 Chimeric mAb Description

Delivery In Stock

Uniprot ID P32246 Rabbit/Human Fc chimeric IgG1 lgG type

Monoclonal Clonality Reactivity Human

Flow Cyt; WB Application Recommend Dilutions Flow Cyt 1:100; WB 1:1000

Purification Purified from cell culture supernatant by affinity chromatography

Formulation & Reconstitution Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Storage & Shipping

specific instructions of reconstitution.

Store at -20°C to .80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

This gene encodes a member of the beta chemokine receptor family, which is predicted to be a seven transmembrane protein similar to G protein-coupled receptors. The ligands of this receptor include macrophage inflammatory protein 1 alpha (MIP-1 alpha); regulated on activation normal T expressed and secreted protein (RANTES); monocyte chemostractant protein 3 (MIP-3) and mywelold progenitor intolly for factor 1 (MIPF-1). Chemokines and their receptors mediated signal transduction are critical for the recruitment of effector immune cells to the site of inflammator, store that the secretary of the control of the description of the control of the description of the control of the control of the description of the control of the contr

Conjugate Unconjugated

Background

DIMA Disclaimer All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is prohibited. We are actively scrutinizing all patent application to ensure no IP infringement.

Figure 1. CCR1 protein is highly expressed on the surface of HEK293 cell membrane. Flow cytometry analysis with Anti-CCR1 (DMC465) on HEK293 cells transfected with human CCR1 (Blue histogram) or HEK293 transfected with irrelevant protein (Red histogram), and Isotype antibody on HEK293 transfected with irrelevant protein (Orange histogram).

Cat. No. DMC100465

Figure 2.Anti-CCR1 antibody (SKU# DMC100465) at 1/1000 dilution

Lane: Hela, whole cell lysate

Secondary: Goat Anti-Rabbit IgG H&L (HRP) at 1/5000 dilution

Predicted band size: 41 kDa Observed band size: 50 kDa

Figure 3. Flow cytometry analysis of antigen binding of anti-human CCR1 mAb(DMC100465). (A) DMC100465 does not bind to CHO-S cells that do not express CCR1. (B) A clear peak shift of DMC100465 was seen compared to the control when incubated with CCR1-expressing 8226 cells, indicating strong binding of DMC100465 to CCR1. Antibodies were incubated at 5  $\mu$ g/ml.
