

## **PRODUCT INFORMATION**

Warning: Undefined variable shasAttributeValueDescription in Cs\www.root\wirror.dimablo.com\wp-content\plugins\woocommerce-print-products\public.chass-woocommerce-print-products-public.php on line 2806 bMC217 Clone ID

CD24 CD24A Synonyme Host Species Rabbit

Anti-CD24 antibody(DMC217); IgG1 Chimeric mAb Description

Delivery In Stock Uniprot ID P25063

Rabbit/Human Fc chimeric IgG1 IgG type

Clonality Monoclonal Reactivity Human Application ELISA; Flow Cyt

Recommend Dilutions ELISA 1:5000-10000; Flow Cyt 1:100

Purification Purified from cell culture supernatant by affinity chromatography

Formulation & Reconstitution Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Storage & Shipping

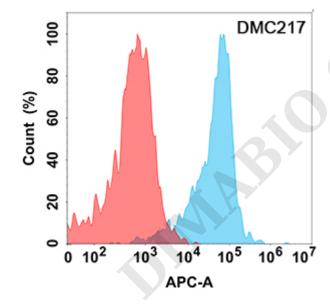

Score at 20°C to 90°C for 12 months in Vophilized form. After reconstitution, if not intended or use within a month, aliquot and store at -80°C (Avoid Score at 20°C to 90°C for 12 months in Vophilized proteins are shipped at ambient temperature.

The general records a silving proper of the proteins are shipped at ambient temperature.

The general records a silving protein the second in mature granulocytes and B cells and modulates growth and differentiation signals to these cells. The precursor protein is cleaved to a short 32 amino acid in mature peptide which is anothered via a glycosyl phosphatidylinostic (GP) link to the cells surface. This gene was missing from previous genome assemblies; but is properly located on chromosome 6. Non-transcribed pseudogenes have been designated on chromosome 1; 15, 20; and X. Alternative splicing results in multiple transcript variants. Background

Usage Conjugate Research use only Unconjugated

All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is prohibited. We are actively scrutinizing all patent application to ensure no IP infringement.

**Figure 1.** Flow cytometry analysis with Anti-CD24 (DMC217) on HEK293 cells transfected with human CD24 (Blue histogram) or HEK293 transfected with irrelevant protein (Red histogram).
