

PRODUCT INFORMATION

Clone ID 1G2 CD3E **Target Synonyms** CD3e:T3E **Host Species** Rabbit

Description Anti-CD3E antibody(1G2), IgG1 Chimeric mAb

Delivery In Stock **Uniprot ID** P07766

IgG type Rabbit/Human Fc chimeric IgG1

Clonality Monoclonal Reactivity Human **Applications** Flow Cyt

Recommended **Dilutions**

Flow Cyt 1/100

Purified from cell culture supernatant by affinity **Purification**

chromatography

Formulation & Reconstitution

Background

Storage & Shipping

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene is the CD3-epsilon polypeptide, which together with CD3-gamma, -delta and -zeta, and the T-cell receptor alpha/beta and gamma/delta het This care, forms the T-cell receptor-CD3 complex. This complex plays an important role in coupling antigen recognition to several intracellular signal-

transduction pathways. The genes encoding the epsilon, gamma and delta polypeptides are located in the same cluster on chromosome 11. The epsilon polypeptide plays an essential role in T-cell development. Defects in this gene cause immunodeficiency. This gene has also been linked to a susceptibility to type I diabetes in women. [provided by RefSeq, Jul 2008]

Usage Research use only Conjugate Unconjugated

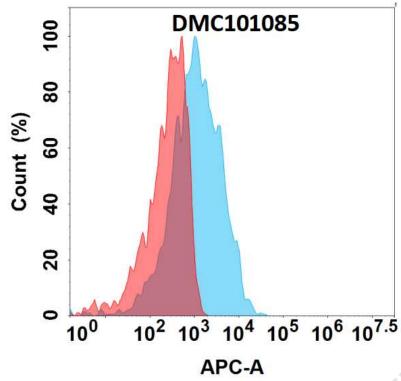

Figure 1. Flow cytometry analysis with 1µg/mL Anti-CD3E (1G2) mAb on Jurkat cells.

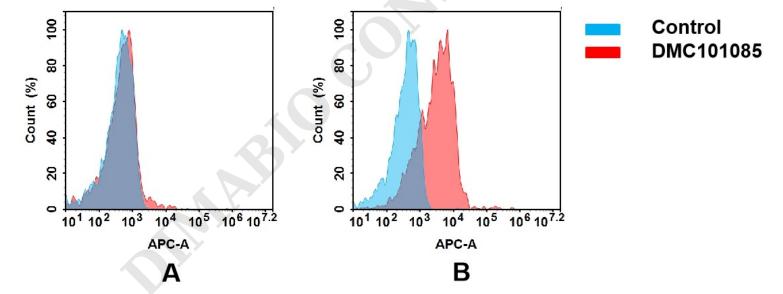

Figure 2. Flow cytometry analysis of antigen binding of anti-human CD3E mAb(DMC101085). (A) DMC101085 does not bind to 293T cells that do not express CD3E. (B) A clear peak shift of DMC101085 was seen compared to the control when incubated with CD3E-expressing Jurkat cells, indicating strong binding of DMC101085 to CD3E. Antibodies were incubated at 5 μ g/mL.
