CLDN6

Claudin 6;Claudin-6;Skullin Synonyme

Host Species Rabbit

Anti-CLDN6 antibody(407C3), IgG1 Chimeric mAb Description

Delivery In Stock Uniprot ID P56747

lgG type Rabbit/Human Fc chimeric IgG1

Clonality Monoclonal Reactivity Human Application Flow Cyt Recommend Dilutions Flow Cyt 1/100

Purification Purified from cell culture supernatant by affinity chromatography

Formulation & Reconstitution Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Storage & Shipping

specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

Tight junctions represent one mode of cell-to-cell adhesion in epithelial or endothelial cell sheets forming continuous seals around cells and serving as a right junctions represent one mode of cell-to-cell adhesion in epithelial or endothelial cell sheets forming continuous seals around cells and serving as a networking strands in the outwardly facing cytoplasmic leaflet, with complementary grooves in the inwardly facing extracytoplasmic leaflet. This gene encodes a component of tight junction strands, which is a member of the claudin family. The protein is an integral membrane protein and is one of the entry cofactors for hepatitis C virus. The gene methylation may be involved in esophageal tumorigenesis. This gene is adjacent to another family member CLIPBO on chromosome 16 (provided by Refseq, Aug 2010)

Usage Research use only

Nuconipasted
All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is prohibited. We are actively scrutinizing all patent application to ensure no IP infringement. DIMA Disclaime
