Storage & Shipping

Store at -20°C to -80°C for I 20 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

This gene encodes a transmembrane protein that functions as a receptor for endogenous peptides guanylin and uroguanylin, and the heat-stable E. coli entertoxin. The encoded protein activates the cystic flurosal remembrane conductance regulator. Mutations in this gene are associated with familial diarrows and administry and meconium lieus (autosomal recessive). I provided by NeTSeq., Nov 2016.
