bM168 Clone ID

MIC-B; PERB11.2 Synonyme

Host Species Rabbit

Anti-MICB antibody(DM168); Rabbit mAb Description Delivery In Stock

Uniprot ID Q29980 lgG type Rabbit IgG Clonality Monoclonal Reactivity Human ELISA; Flow Cyt Application

Recommend Dilutions ELISA 1:5000-10000; Flow Cyt 1:100

Purification Purified from cell culture supernatant by affinity chromatography

Formulation & Reconstitution Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Storage & Shipping

Background

Special 20°C to 480°C for 12 months in Jophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at a fine the Emperature.

This gene encodes a heaving Joposylated protein which is a liquid for the NKC2 type II respects. Binding of the liquid activates the cytolytic response from the protein state of the liquid activates the cytolytic response for the NKC2 type II response. This protein is stress-induced and is similar to MHC class I molecules; however, it does not associate with beta-2-microglobulin or bind peptides. Alternative splicing results in multiple transcript variants.

Usage Conjugate Research use only Unconjugated

All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is prohibited. We are actively scrutinizing all patent application to ensure no IP infringement.

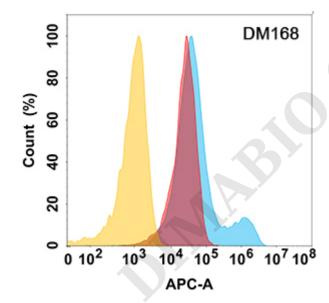

Figure 1. MICB protein is highly expressed on the surface of HEK293 cell membrane. Flow cytometry analysis with Anti-MICB (DM168) on HEK293 cells transfected with human MICB (Blue histogram) or HEK293 transfected with irrelevant protein (Red histogram), and Isotype antibody on HEK293 transfected with irrelevant protein (Orange histogram).
