

PRODUCT INFORMATION

Clone ID **DM71**

Target Mesothelin

Synonyms MSLN; Mesothelin; MPF

Host Species Rabbit

Description Anti-mesothelin antibody(DM71); Rabbit mAb

Delivery In Stock **Uniprot ID** Q13421 IgG type Rabbit IgG Clonality Monoclonal Reactivity Human

Applications ELISA; Flow Cyt; IHC

Recommended

ELISA 1:5000-10000; Flow Cyt 1:100; IHC 1:100 **Dilutions**

Purified from cell culture supernatant by affinity **Purification**

chromatography

Formulation & Reconstitution

Background

Storage & Shipping

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a preproprotein that is proteolytically processed to generate two protein products; megakaryocyte potentiating factor and mesothelin. Megakaryocyte potentiating factor functions as a cytokine that can stimulate colony formation of bone marrow megakaryocytes. Mesothelin is a glycosylphosphatidylinositolanchored cell-surface protein that may function as a cell adhesion protein. This protein is

overexpressed in epithelial mesotheliomas; ovarian cancers and in specific squamous cell carcinomas. Alternative splicing results in multiple transcript variants; at least one of which

encodes an isoform that is proteolytically

processed.

Usage Research use only Conjugate Unconjugated

> All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or

DIMA Disclaimer reverse engineering attempt is prohibited. We are actively scrutinizing all patent application to

ensure no IP infringement.

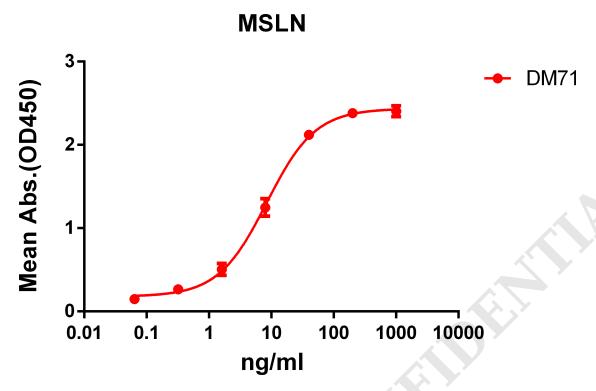

Figure 1. ELISA plate pre-coated by 2 μ g/ml (100 μ l/well) Human MSLN protein, mFc-His tagged protein PME100031 can bind Rabbit anti-MSLN monoclonal antibody (clone: DM71) in a linear range of 1-100 ng/ml.

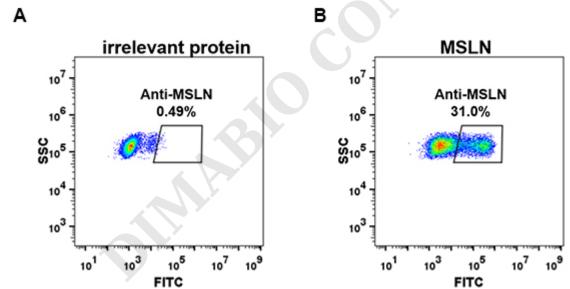

Figure 2. Expi 293 cell line transfected with irrelevant protein (A) and human mesothelin (B) were surface stained with Rabbit anti-MSLN monoclonal antibody $1\mu g/ml$ (clone: DM71) followed by Alexa 488-conjugated anti-rabbit IgG secondary antibody.

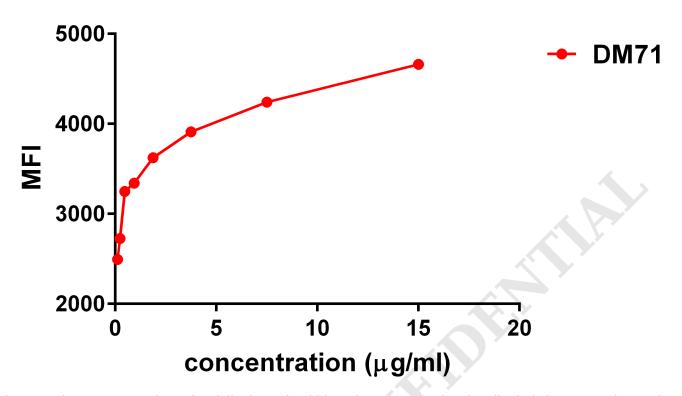

Figure 3. Flow cytometry data of serially titrated Rabbit anti-MSLN monoclonal antibody (clone: DM71) on Hela cells. The Y-axis represents the mean fluorescence intensity (MFI) while the X-axis represents the concentration of IgG used.

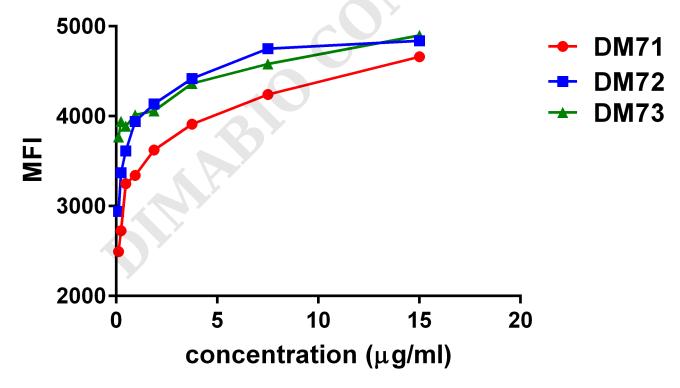

Figure 4. Affinity ranking of different Rabbit anti-MSLN mAb clones by titration of different concentration onto Hela cells. The Y-axis represents the mean fluorescence intensity (MFI) while the X-axis represents the concentration of IgG used.

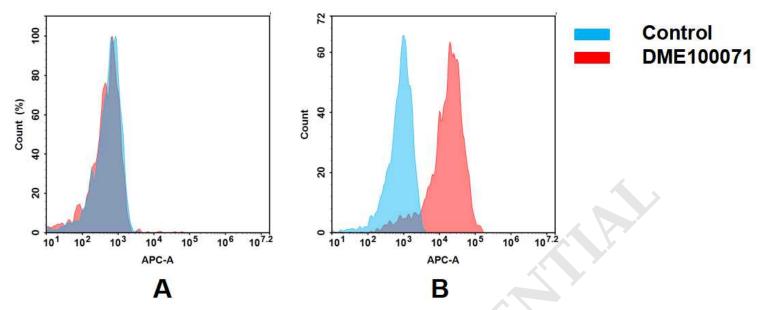

Figure 5. Flow cytometry analysis of antigen binding of rabbit anti-human Mesothelin mAb(DME100071).

(A) DME100071 does not bind to 293T cells that do not express Mesothelin. (B) A clear peak shift of DME100071 was seen compared to the control when incubated with Mesothelin-expressing Hela cells, indicating strong binding of DME100071 to Mesothelin. Antibodies were incubated at 2 μ g/mL.

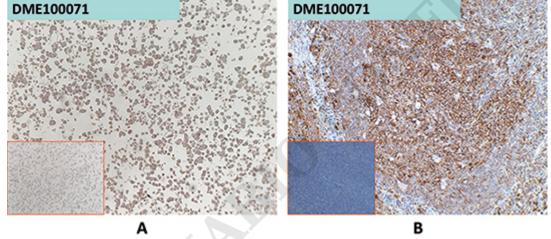

Figure 6. A. DME100071 at $10\mu g/ml$ staining MSLN in Hela cells by IHC (SKU# DME100071);B. DME100071 at $10\mu g/ml$ staining MSLN in human tonsil tissue by IHC (SKU# DME100071)
