DMC275 Clone ID

HSA; PRO0883; PRO0903; PRO1341 Synonyme

Host Species Rabbit

Biotinylated Anti-ALB antibody(DMC275); IgG1 Chimeric mAb Description

Delivery 2-3 weeks Uniprot ID P02768

lgG type Rabbit/Human Fc chimeric IgG1

Clonality Monoclonal Reactivity Human Application Flow Cyt Recommended Dilutions Flow Cyt 1:100

Purification Purified from cell culture supernatant by affinity chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Formulation & Reconstitution

Storage & Shipping

specinic instructions or reconstitution.

Store at 20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

This gene encodes the most abundant protein in human blood. This protein functions in except and of blood plasma colloid osmetic pressure and acts. This gene encodes the most abundant protein in human blood. This protein functions in acids, and metabolites as well as exogenous drugs. Additionally: this protein exhibits an esterase-like activity with broad substrate specificity. The encoded preporportein is protelytically processed to generate the mature protein. A peptide derived from this protein; EPL-4X; is an endogenous inhibitor of the CXCRA chemokine receptors. Background
