specific instructions of reconstitution.

Store at -20°C to 80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

This gene encodes a type Immediate proteins are shipped at ambient temperature, and it is the ligand for two proteins at the cell surface of T cells: CD28 antique and cytotoxic T-lymphocyte-associated protein 4. Binding of this protein with cytotoxic T-lymphocyte-associated protein 4 negatively regulates T-cell activation and diminishes the immune response. Alternative splicing results in several transcript variants encoding different incommunity of the specific protein with cytotoxic prote Background
