Cat. No. DMC100463B

## PRODUCT INFORMATION

Warning: Undefined variable ShasAttributeValueDescription in C:\www.root\mirror.dimablo.com\wp-content\plugins\woocommerce-print-products\public\class-woocommerce-print-products-public.php on line 2806 bMC463 Clone ID

CD142

TF; Coagulation factor III; F3 Synonyme

Host Species Rabbit

Biotinylated Anti-CD142 antibody(DMC463); IgG1 Chimeric mAb Description

Delivery 2-3 weeks Uniprot ID P13726

lgG type Rabbit/Human Fc chimeric IgG1

Clonality Monoclonal Reactivity Human Application Flow Cyt Recommended Dilutions Flow Cyt 1:100

Purification Purified from cell culture supernatant by affinity chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Formulation & Reconstitution

Storage & Shipping

specific instructions of reconstitution.

Store at 20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid respeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

This gene encodes coagulation factor III which is a cell surface glycoprotein. This factor enables cells to initiate the blood coagulation accades; and it the coagulation protease cascades by specific limited proteolysis. Unlike the other cofactors of these proteaseds: which circulate as nonfunctional precursors; this factor is a potent initiator that is fully functional when expressed on cell surfaces for example; on monocytes. There are 3 distinct domains of this factor current current coagulation according to the specific coagulation according to the coagulation according to the specific coagulation according to the coagulation according to the coagulation according to the coagulation according to the specific coagulation according to the coagulation according to the specific coagulation according to the specific coagulation a
