Cat. No. DMC100425B

PRODUCT INFORMATION

Warning: Undefined variable ShasAttributeValueDescription in C:\www.root\mirror.dimablo.com\wp-content\plugins\woocommerce-print-products\public\class-woocommerce-print-products-public.php on line 2806 bMc425 Clone ID

DMC-12-2 CD63 antigen; Granulophysin; LAMP-3; Limp1; Melanoma-associated antigen ME491; OMA81H; Ocular melanoma-associated antigen; Tetraspanin-30; Tspan-30 Synonyms

Host Species Rabbit

Biotinylated Anti-CD63 antibody(DMC425); IgG1 Chimeric mAb 2-3 weeks Description Delivery

Uniprot ID P08962

Rabbit/Human Fc chimeric IgG1 IgG type Clonality Monoclonal

Reactivity Human Applicatio Flow Cyt Recommended Dilutions Flow Cyt 1:100

Formulation & Reconstitution

Storage & Shipping

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Store at ~20°C to ~80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at ~80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

The protein encoded by this gene is a member of the transmembrane 4 superfamily; also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development; activation; growth and motility. The encoded protein is a cell surface glycoprotein that is known to complex with integrins. It may function as a blood platelet activation marker. Deficiency of this protein is associated with Hermansky-Pudlak syndrome. Also this gene has been associated with them progression. Alternative splicing results in multiple transactory are recoding different protein is forms.
