

## **PRODUCT INFORMATION**

Clone ID 1G9 CL2A **Target** N.A. **Synonyms** Rabbit **Host Species** 

Biotinylated Anti-CL2A(ADC linker) antibody(1G9); Description

Rabbit mAb

**Delivery** 2-3 weeks

**Uniprot ID** N.A.

Rabbit IgG IgG type Clonality Monoclonal

Reactivity N.A. **Applications ELISA** 

Recommended

**Background** 

ELISA 1:5000-10000 **Dilutions** 

Purified from cell culture supernatant by affinity **Purification** 

chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

CL2A is a crucial component in antibody-drug conjugate (ADC) therapy, acting as a chemical linker that connects a potent DNA topoisomerase I inhibitor, SN-38, to an antibody. Representing Cysteine-Linked 2-Aminoethyl, CL2A features a complex structure with a PEG8 chain, a triazole ring, a PABC-peptide, and a maleimide group. The maleimide group binds to a cysteine residue on

the antibody, facilitating targeted drug delivery. Designed to release SN-38 in acidic cancer cell environments, CL2A induces DNA damage and cell death. This versatile linker is employed in ADCs targeting various antigens like Trop-2 or

HER2, tailored to specific cancer types.

**Usage** Research use only

Conjugate Biotinylated
