Description

Host Species Rabbit Biotinylated Anti-DNAM1 antibody(DM96); Rabbit mAb

Delivery 2-3 weeks Q15762 Uniprot ID Rabbit IgG

lgG type Clonality Monoclonal Reactivity Application ELISA; Flow Cyt

Recommended Dilutions ELISA 1:5000-10000; Flow Cyt 1:100

Purification Purified from cell culture supernatant by affinity chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Formulation & Reconstitution

Storage & Shipping

specific instructions or reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

This gene encodes a glycoprotein expressed on the surface of NK cells; platelets; moncycytes and a subset of T cells. It is a member of the Ig-superfamily containing 2 Ig-like domains of the V-set. The protein mediates cellular adhesion of platelets and megakaryocytic cells to vascular endothelial cells. The protein also Iglays a role in megakaryocytic cells in adharation. Alternative splicing results in multiple transcript variants.
