

PRODUCT INFORMATION

Clone ID 1A11
Target FCRL5

Synonyms CD307; FCRH5; IRTA2; BXMAS1; CD307e; PRO820

Host Species Rabbit

DescriptionBiotinylated Anti-FCRL5 antibody(1A11), Rabbit

mAb

IHC

Delivery 2-3 weeks
Uniprot ID Q96RD9
IgG type Rabbit IgG
Clonality Monoclonal
Reactivity Human

Recommended

Storage & Shipping

Background

Applications

Dilutions IHC 1:100

PurificationPurified from cell culture supernatant by affinity

chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a member of the

immunoglobulin receptor superfamily and the Fcreceptor like family. This gene and several other Fc receptor-like gene members are clustered on the long arm of chromosome 1. The encoded protein is a single-pass type I membrane protein and contains 8 immunoglobulin-like C2-type domains. This gene is implicated in B cell development and lymphomogenesis. Alternatively

domains. This gene is implicated in B cell development and lymphomagenesis. Alternatively spliced transcript variants encoding different isoforms have been identified. [provided by

RefSeq, Sep 2010]

Usage Research use only

Conjugate Biotinylated

All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or
