Cat. No. DME100216B

## **PRODUCT INFORMATION**

Clone ID DM216 **GFAP Target ALXDRD Synonyms** Rabbit **Host Species** 

Biotinylated Anti-GFAP(68-377) antibody(DM216); Description

Rabbit mAb **Delivery** 2-3 weeks **Uniprot ID** P14136 IgG type Rabbit IgG Clonality Monoclonal

Reactivity **Applications ELISA** 

Recommended **Dilutions** 

Storage & Shipping

**DIMA Disclaimer** 

ELISA 1:5000-10000

Purified from cell culture supernatant by affinity **Purification** 

chromatography

Human

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes one of the major intermediate filament proteins of mature astrocytes. It is used as a marker to distinguish astrocytes from other glial cells during development. Mutations in this

**Background** gene cause Alexander disease; a rare disorder of astrocytes in the central nervous system.

Alternative splicing results in multiple transcript variants encoding distinct isoforms. [provided by RefSeg; Oct 2008]

Research use only Usage
