

PRODUCT INFORMATION

Clone ID **DMC427** GP6 **Target**

Synonyms BDPLT11; GPIV; GPVI

Host Species Rabbit

Biotinylated Anti-GP6 antibody(DMC427); IgG1 Description

Chimeric mAb

Delivery 2-3 weeks **Uniprot ID** Q9HCN6

Rabbit/Human Fc chimeric IgG1 IgG type

Clonality Monoclonal Reactivity Human **Applications** Flow Cyt

Recommended

Flow Cyt 1:100 **Dilutions**

Purified from cell culture supernatant by affinity **Purification**

chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

témperature.

This gene encodes a platelet membrane glycoprotein of the immunoglobulin superfamily. The encoded protein is a receptor for collagen and plays a critical role in collagen-induced platelet aggregation and thrombus formation. The encoded protein forms a complex with the Fc

receptor gamma-chain that initiates the platelet activation signaling cascade upon collagen **Background**

binding. Mutations in this gene are a cause of platelet-type bleeding disorder-11 (BDPLT11). Alternatively spliced transcript variants encoding multiple isoforms have been observed for this

gene.

Usage Research use only

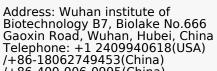

Conjugate Biotinylated
