

## **PRODUCT INFORMATION**

Clone ID 6E3

**GUCY2C Target** 

**Synonyms** DIAR6;GC-C;GUC2C;MECIL;MUCIL;STAR

**Host Species** Rabbit

Biotinylated Anti-GUCY2C antibody(6E3), IgG1 Description

Chimeric mAb

**Delivery** 2-3 weeks **Uniprot ID** P25092

Rabbit/Human Fc chimeric IgG1 IgG type

Clonality Monoclonal Reactivity Human WB **Applications** 

Recommended

**Background** 

WB 1:1000 **Dilutions** 

Purified from cell culture supernatant by affinity **Purification** 

chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a transmembrane protein that functions as a receptor for endogenous peptides guanylin and uroguanylin, and the heat-stable E. coli enterotoxin. The encoded protein activates the cystic fibrosis transmembrane conductance regulator. Mutations in this gene are associated

with familial diarrhea (autosomal dominant) and meconium ileus (autosomal recessive). [provided

by RefSeq, Nov 2016]

**Usage** Research use only

Conjugate Biotinylated
