His Tag his tag Synonyme Host Species Rabbit

Biotinylated Anti-His Tag Antibody(DM1); Rabbit mAb Description

Delivery 2-3 weeks Rabbit IgG IgG type

Detects proteins containing accessible consecutive histidine regions. The antibody detects His tags localized at the amino- or carboxyl- terminus. Reactivity

Applications ELISA; WB Recommend Dilutions

Purification

Lyophilized from sterile PBS, p17.4, Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

The rabbit immune system generates antibody diversity and optimizes affinity, Anti-His Tap Antibody(DM1): Rabbit mab is specific to six histidine tags placed at C-terminal and internal regions of fusion proteins. This antibody can greatly improve the effectiveness of several different kinds ofimmunoassays; helping researchers identify; detect; and purify polyhistidine fusion proteins bacteria; insect cells; and mammalian cells. Formulation & Reconstitution Storage & Shipping

Background

Conjugate Biotinylated

DIMA Disclaimer All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is prohibited. We are actively scrutinizing all patent application to ensure no IP infringement.
