

PRODUCT INFORMATION

Clone ID 1A2 **IFNG Target**

Synonyms IFN-gamma;Immune interferon

Host Species

Biotinylated Anti-IFNG antibody(1A2), IgG1 Description

Chimeric mAb

Delivery 2-3 weeks **Uniprot ID** P01579

Rabbit/Human Fc chimeric IgG1 IgG type

Clonality Monoclonal Reactivity Human **Applications ELISA**

Recommended

Storage & Shipping

Background

ELISA 1/5000-10000 **Dilutions**

Purified from cell culture supernatant by affinity **Purification**

chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & - 9% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -81°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

IFNy is the major interferon produced by mitogenically or antigenically stimulated lymphocytes. It is structurally different from type I interferon and its major activity is

immunoregulation. It has been implicated in the expression of class II histocompatibility antigens in cells that do not normally produce them, leading to autoimmune disease. Interferon

gamma is produced mainly byT-cells and natural killer cells activated by antigens, mitogens, or alloantigens. It is produced by lymphocytes expressing the surface antigens CD4 and CD8. IFNy synthesis is induced by IL-2, FGF-basic, and

Usage Research use only

Conjugate Biotinylated
