bn/209 Clone ID

ARIA; GGF; GGF2; HGL; HRG; HRG1; HRGA; MST131; MSTP131; NDF; NRG1-IT2; SMDF Synonyme

Host Species Rabbit

Biotinylated Anti-NRG1 antibody(DM209); Rabbit mAb Description Delivery 2-3 weeks

Q02297 Uniprot ID lgG type Rabbit IgG Clonality Monoclonal Reactivity Application ELISA; Flow Cyt

Recommended Dilutions ELISA 1:5000-10000; Flow Cyt 1:100

Purification Purified from cell culture supernatant by affinity chromatography

Formulation & Reconstitution Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Storage & Shipping

Specific instructions or reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

The protein encoded by this gene is a membrane glycoprotein that mediates cell, spling and plays a critical role in the growth and development. The protein encoded by this gene is a membrane glycoprotein that mediates cell, seel and miss page through allowing the protein that growth and development. The specific protein is a specific protein that growth are supported by the protein that growth are supported in a tissue-specific manner and differ significantly in their structure; and are classified as types I; II; III; IV, V and VI. Dysregulation of this gene has been linked to diseases such as cancer; schizoprienia; and bipolar disorder (BPD). Background
