Cat. No. DMC100222B

PRODUCT INFORMATION

Warning: Undefined variable ShasAttributeValueDescription in C:\www.root\mirror.dimablo.com\wp-content\plugins\woocommerce-print-products\public\class-woocommerce-print-products-public.php on line 2806 bMC222 Clone ID

PCSKQ

FH3; FHCL3; HCHOLA3; LDLCQ1; NARC-1; NARC1; PC9 Synonyme

Host Species Rabbit

Biotinylated Anti-PCSK9 antibody(DMC222); IgG1 Chimeric mAb Description

Delivery 2-3 weeks Q8NBP7 Uniprot ID

lgG type Rabbit/Human Fc chimeric IgG1

Clonality Monoclonal Reactivity Human Applications ELISA; Flow Cyt

Recommended Dilutions ELISA 1:5000-10000; Flow Cyt 1:100

Purification Purified from cell culture supernatant by affinity chromatography

Formulation & Reconstitution Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Storage & Shipping

specific instructions of reconstitution.

Store at -20°C to .80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

This gene encodes a member of the subtilisin-like proprotein convertase family: which includes proteases that process protein and peptide precursors trafficking through regulated or constitutive branches of the secretory pathway. The encoded protein undergoes an autocatalytic processing event with liver; intestine and kidney tissues and escorts specific receptors for lyosomal degradation. It plays a role in cholest and fathy action and that yad in metabolism. Mutations in this gene have been associated with autosomal dominant familial hypercholesterolemia. Alternative splicing results in multiple transcript variants.
