

## **PRODUCT INFORMATION**

Clone ID DMC462 **PRLR Target** 

**Synonyms** Prolactin receptor; PRL-R

**Host Species** 

Biotinylated Anti-PRLR antibody(DMC462); IgG1 Description

Chimeric mAb

**Delivery** 2-3 weeks **Uniprot ID** P16471

Rabbit/Human Fc chimeric IgG1 IgG type

Clonality Monoclonal Reactivity Human **Applications** Flow Cyt

Recommended

Storage & Shipping

**Background** 

Flow Cyt 1:100 **Dilutions** 

Purified from cell culture supernatant by affinity **Purification** 

chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

témperature.

This gene encodes a receptor for the anterior pituitary hormone; prolactin; and belongs to the type I cytokine receptor family. Prolactindependent signaling occurs as the result of ligand-induced dimerization of the prolactin receptor. Several alternatively spliced transcript

variants encoding different membrane-bound and soluble isoforms have been described for this

gene; which may function to modulate the endocrine and autocrine effects of prolactin in normal tissue and cancer. [provided by RefSeg;
