

PRODUCT INFORMATION

DM113 Clone ID Target TNFRSF10B

TNFRSF10B;TRAILR2;TRAIL-R2;CD262;DR5;KILLER;TRICK2;ZTNFR9;TRICKB **Synonyms**

Host Species

Description Biotinylated Anti-TNFRSF10B antibody(DM113); Rabbit mAb

Delivery 2-3 weeks **Uniprot ID** 014763 Rabbit IgG laG type Clonality Monoclonal Reactivity Human

Applications ELISA; Flow Cyt

Recommended Dilutions

Background

ELISA 1:5000-10000; Flow Cyt 1:100

Purification Purified from cell culture supernatant by affinity chromatography Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Formulation &

Reconstitution

Storage & Shipping

Analysis for specific instructions of reconstitutions.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

snipped at ambient temperature.

The protein encoded by this gene is a member of the TNF-receptor superfamily; and contains an intracellular death domain. This receptor can be activated by tumor necrosis factor-related apoptosis inducing ligand (TNFSF10:TRAIL:APO-2L); and transduces an apoptosis signal. Studies with FADD-deficient mice suggested that FADD; a death domain containing adaptor protein; is required for the apoptosis mediated by this protein. Two transcript variants encoding different isoforms and one noncoding transcript have been found for this gene.
