

PRODUCT INFORMATION

CSF1R **Target**

FMS; CSFR; FIM2; GPSC; HDLS; C-FMS; CD115; **Synonyms**

HDLS1; CSF-1R; BANDDOS; M-CSF-R

Recombinant human CSF1R(400-517) Protein with **Description**

C-terminal human Fc tag

Delivery In Stock **Uniprot ID** P07333 **Expression Host** HFK293

C-Human Fc tag Tag

Molecular

Molecular Weight

Background

CSF1R(Tyr400-Pro517) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of

39.2 kDa after removal of the signal peptide. The apparent molecular mass of CSF1R(400-517)-hFc is approximately 35-70 kDa due to glycosylation.

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue **Purity**

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before Formulation & lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene is the receptor for colony stimulating factor 1, a cytokine which controls the production, differentiation, and function of macrophages. This receptor mediates most if not all of the biological effects of this cytokine. Ligand binding activates the receptor kinase through a process of oligomerization and transphosphorylation. The encoded protein is a tyrosine kinase transmembrane receptor and member of the CSF1/PDGF receptor family of tyrosine-protein kinases. Mutations in this gene

have been associated with a predisposition to myeloid malignancy. The first intron of this gene contains a transcriptionally inactive ribosomal protein L7 processed pseudogene oriented in the opposite direction. Alternative splicing results in multiple transcript variants. Expression of a splice variant from an LTR promoter has been found in Hodgkin lymphoma (HL), HL cell lines and

anaplastic large cell lymphoma. [provided by

RefSeq, Mar 2017] Research use only

Usage

Conjugate Unconjugated
