

## **PRODUCT INFORMATION**

buteValueDescription in C:\wwwroot\mirror.dimabio.com\wp-content\plugins\woocommerce-print-e-print-products-public.php on line 2806 Tag

GPR161

Human GPR161-Strep full length protein-synthetic nanodisc

Delivery In Stock Uniprot ID 08N6U8 HEK293 **Expression Host** 

Protein Families Druggable Genome, GPCR, Transmembrane

Protein Pathways

Molecular Weight The human full length GPR161-Strep protein has a MW of 58.6 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Formulation & Reconstitution Storage & Shipping

Store at 20°C to 80°C for 12 months in lyophilized form. After reconstitution, in not intended for use within a month, aliquot and store at -80°C (Avoid repeated freeign and thawing). Lyophilized proteins are shipped at ambient temperature. The protein is an orphan G protein-coupled receptor whose ligand is unknown. This gene is overexpressed in triple-negative breast cancer, and dispute the same proteins are shipped as the cancer cells. Therefore, this gene is a potential drug target for triple-negative breast cancer.

Research use only Usage Conjugate Unconjugated

## ELISA assay to evaluate GPR161-Strep-Nanodisc 0.2µg Human GPR161-Strep-Nanodisc per well

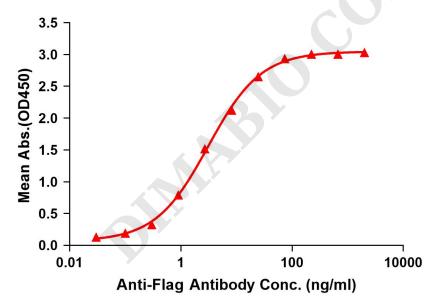

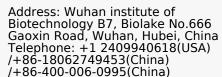

Figure 1. Elisa plates were pre-coated with C-Flag&Strep Tag GPR161-Strep-Nanodisc ( $0.2\mu g/per$  well). Serial diluted anti-Flag monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-Flag monoclonal antibody binding with GPR161-Strep-nanodisc is 3.103ng/ml.
