Warning: Undefined variable \$hasAttributeValueDescription in C:\www.root\mirror.dimabio.com\wp-content\plugins\woocommerce-print-products-public.php on line 2806 C-HagdStrep Tag Tag

7TMR, ADMR, AM-R, AMR, G10D, L1-R, gamrh, hrhAMR Synonyme Human GP182-Strep full length protein-synthetic nanodisc

Description Delivery Uniprot ID 015218 HEK293 Expression Host

Protein Families GPCR,Transmembrane,Druggable Genome,

Protein Pathways Smooth muscle contraction,

Molecular Weight The human full length GP182-Strep protein has a MW of 45.3 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCI, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Formulation & Reconstitution

DIMARIO CONTINUE DE LA CONTINUE DE L ryopimization. Treads see Letrificate or anialysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 cmonths in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

Adrenomedullin is a potent vascodilator peptide that exerts major effects on cardiovascular function. This gene encodes a seven-transmembrane protein that belongs to the family 1 of G-protein coupled receptors. Studies of the rat counterpart suggest that the encoded protein may function as a receptor for adrenomedullin. [provided by RefSeq, jul 2008] Storage & Shipping
