GPCR, bA86F4.3

Synonyme

Human GPC6A full length protein-synthetic nanodisc

Description Delivery 6~8weeks Uniprot ID O5T6X5 Expression Host HEK293

Protein Families Transmembrane, Druggable Genome

Protein Pathways

Molecular Weight The human full length GPC6A protein has a MW of 104.8kDa

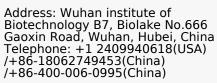

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCI, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Formulation & Reconstitution

Storage & Shipping

yopminization. Prease see Letrincate or Analysis for Specini instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

Members of family C of the 6 protein-coupled receptor (GPCR) superfamily, such as GPRC6A, are characterized by an evolutionarily conserved amino acid-sensing motif linked to an intramembranous 7-transmembrane loop region. Several members of GPCR family C, including GPRC6A, also have a long N-terminal domain (summary by Pet et al., 2005 (PubMed 16199352)],(supplied by OMIM), Nov 2010]

Usage Research use only Conjugate
