GPR15 Synonyms

Human GPR15 full length protein-synthetic nanodisc

Description Delivery 6~8weeks Uniprot ID P49685 HEK293 Expression Host

Protein Families GPCR,Transmembrane,Druggable Genome GPCRDB Class A Rhodopsin-like, Protein Pathways

Molecular Weight The human full length GPR15 protein has a MW of 40.8kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCI, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Formulation & Reconstitution

syupminisations, resease see Lettinicate or Analysis for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in Joynblisted form. After reconstitution, in not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature. This gene encodes a G protein-roupled receptor that acts as a chemokine receptor for human immunodeficiency virus type 1 and 2. The encoded protein localizes to the cell membrane. [provided by RefSeq, Nov 2012] Research use only Storage & Shipping Background

Usage Conjugate Unconjugated
