GPR27 Synonyme

Human GPR27 full length protein-synthetic nanodisc 6~8weeks

Description Delivery Uniprot ID O9NS67 HEK293 Expression Host

Protein Families GPCR,Transmembrane,Druggable Genome

GPCRDB Class A Rhodopsin-like, Protein Pathways

Molecular Weight The human full length GPR27 protein has a MW of 39.8kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCI, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Formulation & Reconstitution

Storage & Shipping

OINIARIO CONTINUE DE LA CONTINUE DE lyophilization, Please see Certificate of Analysis for specific instructions of reconstitution. Store at -20°C to -80°C for 12 nombte in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

GRP27 is a membrane of the G protein-coupled receptors (GRCRs), a large family of receptors that have a similar structure characterized by 7 transmembrane domains. Activation of GPCRs by extracellular stimuli such as neurotransmitters, hormones, or light induces an intracellular signaling cascade mediated by heterotrimeric GTP-binding proteins, or G proteins. [supplied by OMIM, May 2010]
