Description Delivery Human GPR42 full length protein-synthetic nanodisc

6~8weeks Uniprot ID 015529 HEK293 Expression Host

Protein Families GPCR, Transmembrane, Druggable Genome,

Protein Pathways

Molecular Weight The human full length GPR42 protein has a MW of 38.7kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCI, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Formulation & Reconstitution

ryopinication: resease see Lettincate or Analysis for Specific Instructions of reconstitution. Store at -20°C to -80°C for 12 months in hyophitized form. After reconstitution, front intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature probable (a protein-coupled receptor that may be activated by a major product of dietary fiber digestion, the short chain fatty acids (SCFAs), and that may be a reliable to the regulation of whole-body energy homeostasis and/or in intestinal immunity.[UniProtKB]:wiss-Prot Function]
Research use of the regulation of whole-body energy homeostasis and/or in intestinal immunity.[UniProtKB]:wiss-Prot Function] Storage & Shipping Background
