Synonyme

Human GPR87-Strep full length protein-synthetic nanodisc

Description Delivery 6~8weeks Uniprot ID O9BY21 HEK293 Expression Host

Protein Families Druggable Genome, GPCR, Transmembrane

Protein Pathways

Molecular Weight The human full length GPR87-Strep protein has a MW of 41.3 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCI, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Formulation & Reconstitution Storage & Shipping

yopminization: recease see Lettinicate or inanitysis for specific instructions or reconstitution. Store at -20°C to -80°C for 12 months in Joynbilized form. After ecconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

This gene encodes a G protein-coupled receptor and is located in a cluster of G protein-couple receptor genes on chromosome 3. The encoded protein has been shown to be overexpressed in lung squamous cell carcinoma (PMID:18057535) and regulated by p53 (PMID:19602589). [provided by RefSeq. Nov 2011]
