Synonyme

Human MC5R full length protein-synthetic nanodisc

Description Delivery 6~8weeks Uniprot ID P33032 Expression Host HEK293

Protein Families GPCR,Transmembrane,Druggable Genome GPCRDB Class A Rhodopsin-like,Peptide GPCRs, Protein Pathways Molecular Weight The human full length MC5R protein has a MW of 36.6kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Formulation & Reconstitution

Storage & Shipping

Olinia in the second of the se lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12°C months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

This gene encodes a member of the seven-pass transmembrane G protein-coupled melanocytrin receptor protein family that stimulate cAMP signal transduction. The encoded protein is a receptor for melanocyte-stimulating hormone and adrenocorticotropic hormone and is suggested to play a role in sebum generation. [provided by RefSeq. Jun 2010]
