Description Delivery Human OX2R full length protein-synthetic nanodisc

6~8weeks Uniprot ID 043614 Expression Host HEK293 Protein Families Druggable Genome,

GPCRDB Class A Rhodopsin-like, Neurotrophin & Receptors, Protein Pathways Molecular Weight The human full length OX2R protein has a MW of 50.7kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCI, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Formulation & Reconstitution

OINIARIO CONTINUE DE LA CONTINUE DE lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Store at -20°C to .80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

The protein encoded by this gene is a G-protein coupled receptor involved in the regulation of feeding behavior. The encoded protein binds the hypothalamic neuropeptides orexin A and orexin B. A related gene (HCRTR1) encodes a G-protein coupled receptor that selectively binds orexin A. [provided by RefSeq. Jan 2009]
