

## **PRODUCT INFORMATION**

Tag

Synonyms

Human P2RY8 full length protein-synthetic nanodisc

Description Delivery 6~8weeks Uniprot ID 086VZ1 HEK293 Expression Host

Protein Families GPCR,Transmembrane,Druggable Genome

Protein Pathways

Molecular Weight The human full length P2RY8 protein has a MW of 40.6kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCI, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Formulation & Reconstitution

Storage & Shipping

DIMARIO CONTINUE DI LA CONTINUE DE L Some at 20°C to 80°C for 12 nonthis in Joshibized from Africa reconstitution. Some at 20°C to 80°C for 12 nonthis in Joshibized from Africa reconstitution, I make intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature. The protein encoded by this gene belongs to the family of G-protein coupled receptors, that are preferentially activated by adenosine and uridine nucleotides. This gene is moderately expressed in undifferentiated HL60 cells, and is located on both chromosomes X and Y. [provided by RefSeq, Jul 2008]
