

PRODUCT INFORMATION

Target	QRFPR
Synonyms	AQ27; GPR103; SP9155
Description	Recombinant human QRFPR Protein with C-terminal human Fc tag
Delivery	In Stock
Uniprot ID	Q96P65
Expression Host	HEK293
Tag	C-Human Fc tag
Molecular Characterization	QRFPR(Met1-Lys45) hFc(Glu99-Ala330)
Molecular Weight	The protein has a predicted molecular mass of 31.5 kDa after removal of the signal peptide. The apparent molecular mass of QRFPR-hFc is approximately 35-55 kDa due to glycosylation.
Purity	The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.
Formulation & Reconstitution	Lyophilized from sterile PBS, pH 7.4. Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.
Storage & Shipping	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
Background	Enables G protein-coupled receptor activity. Involved in G protein-coupled receptor signaling pathway. Predicted to be located in non-motile cilium. [provided by Alliance of Genome Resources, Nov 2024]
Usage	Research use only
Conjugate	Unconjugated
