TSPAN33 PEN; PEN.; TSPAN-33 Synonyme

Description Delivery Human TSPAN33-Strep full length protein-synthetic nanodisc

6~8weeks Uniprot ID 086UF1 HEK293 Expression Host Protein Families

Protein Pathways

Molecular Weight The human full length TSPAN33-Strep protein has a MW of 31.5 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCI, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Formulation & Reconstitution

Storage & Shipping

lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Store at -20°C to .80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature. Plays an important role in normal erythropoissis (By similarity). It has a role in the differentiation of crythroid propenitors (By similarity). Regulates maturation and trafficking of the transmembrane metalloprotease ADAM10 (PubMed:26686862). Negatively regulates ligand-induced Notch activity probably by regulating ADAM10 activity (PubMed:26686862). Research use only
