Human UTS2R full length protein-synthetic nanodisc

Description Delivery In Stock Uniprot ID O9UKP6 HEK293 Expression Host

Protein Families Druggable Genome, GPCR, Transmembrane Protein Pathways Neuroactive ligand-receptor interaction

Molecular Weigh The human full length UTS2R protein has a MW of 42.1 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCI, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Formulation & Reconstitution Storage & Shipping

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

High affinity receptor for uncetain-2 and unotensin-28. The activity of this receptor is mediated by a G-protein that activate a phosphatidylinositol-activate and independent of the protein of the store of the store

Background Usage

Conjugate Unconjugated
