Cat. No. DME100205P

## PRODUCT INFORMATION

Warning: Undefined variable ShasAttributeValueDescription in C:\www.root\mirror.dimablo.com\wp-content\plugins\woocommerce-print-products\public\class-woocommerce-print-products-public.php on line 2806 bM205 Clone ID

ANGPTL3

ANG-5; ANGPT5; ANL3; FHBL2 Synonyme

Host Species Rabbit

PE-conjugated Anti-ANGPTL3 antibody(DM205); Rabbit mAb Description

Delivery Under Development Uniprot ID Q9Y5C1 IgG type Rabbit IgG Clonality Monoclonal Reactivity Human Flow Cyt Applications Recommended Dilutions

Purification Purified from cell culture supernatant by affinity chromatography

Flow Cyt 1:100 Formulation & Reconstitution Liquid PBS with 0.05% Proclin300, 1% BSA

Storage & Shipping Store at 2°C-8°C for 6 months

This gene encodes a member of a family of secreted proteins that function in angiogenesis. The encoded protein; which is expressed predominantly in the liver; is further processed into an N-terminal colled-coil domain-containing chain and a C-terminal Brinnogen chain. The N-terminal chain is important for ligid metabolism, while the C-terminal chain may be involved in angiogenesis. Mutations in this gene cause familial hypocheal propredemental type 2.

Research use only
