Cat. No. DMC100688P

## **PRODUCT INFORMATION**

Warning: Undefined variable ShasAttributeValueDescription in C:\www.root\mirror.dimablo.com\wp-content\plugins\woocommerce-print-products\public\class-woocommerce-print-products-public.php on line 2806 bMC688 Clone ID

ASGPR; ASGPR1; CLEC4H1; HL-1 Synonyme

Host Species Rabbit

PE-conjugated Anti-ASGR1 antibody(DMC688), IgG1 Chimeric mAb Description

Delivery Under Development Uniprot ID P07306; Q6FGQ5 IgG type Rabbit/Human Fc chimeric IgG1

Clonality Monoclonal Reactivity Human Flow Cyt Applications Recommended Dilutions Flow Cyt 1:100

Purification Purified from cell culture supernatant by affinity chromatography

Formulation & Reconstitution Liquid□PBS with 0.05% Proclin300, 1% BSA

Storage & Shipping

This gene encodes a subunit of the asialoglycoprotein receptor. This receptor is a transmembrane protein that plays a critical role in serum glycoprotein benedicted by mediating the endocytosis and lycosomal degradation of glycoproteins with exposed terminal galactose on N-acetylagiactosamine residues. The asialoglycoprotein receptor may facilitate hepatic infection by multiple viruses including hepatitis B; and is also a target for liver-specific drug delivery. The asialoglycoprotein receptor is a hetero-disponentic protein composed of major and minor subunish thich are encoded by different genes. The protein encoded by this gene is the more abundant major subunit. Alternatively spliced transcript variants encoding multiple isoforms have Been observed for this gene. [provided by RefSeq; Jan 2011]
