Host Species Rabbit

PE-conjugated Anti-CD155 antibody(DM146); Rabbit mAb Description

Delivery Under Development Uniprot ID P15151 IgG type Rabbit IgG Clonality Monoclonal Reactivity Human Flow Cyt Applications Recommended Dilutions

Purification Purified from cell culture supernatant by affinity chromatography

Formulation & Reconstitution Liquid PBS with 0.05% Proclin300, 1% BSA

Flow Cyt 1:100

Storage & Shipping Store at 2°C-8°C for 6 months

The protein encoded by this gene is a transmembrane glycoprotein belonging to the immunoglobulin superfamily. The external domain mediates cell attachment to the extracellular matrix molecule vitronectin; while its intracellular domain interacts with the dynein light chain Tctex-LDYNLT1. The gene is specific to the primate lineage; and serves as a cellular receptor for poliovirus in the first step of poliovirus replication. Multiple transcript variance encoding different boforms have been found for this gene.

Research use of the description of the properties of t

Usage Coniugate

PE-conjugated
All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is prohibited. We are actively scrutinizing all patent application to ensure no IP infringement. DIMA Disclaimer
