Cat. No. DMC101041P

PRODUCT INFORMATION

Warning: Undefined variable \$hasAttributeValueDescription in Cs\www.root\mirror.dimablo.com\wp-content\plugins\woocommerce-print-products\public.class-woocommerce-print-products-public.php on line 2806 6A10 Clone ID

CDH3 CDHP;HJMD;PCAD Synonyme

Host Species Rabbit

PE-conjugated Anti-CDH3 antibody(6A10); IgG1 Chimeric mAb Description

Delivery Under Development Uniprot ID

IgG type Rabbit/Human Fc chimeric IgG1 Clonality Monoclonal Reactivity Human

Flow Cyt Application Recommended Dilutions Flow Cyt 1:100

Purification Purified from cell culture supernatant by affinity chromatography

Formulation & Reconstitution Liquid PBS with 0.05% Proclin300, 1% BSA

Storage & Shipping

This gene encodes a classical cadherin of the cadherin superfamily. Alternative splicing results in multiple transcript variants, at least one of which encodes a preproportein that is proteolytically processed to generate the mature glycoprotein. This calcium-dependent cell-cell adhesion protein is comprised of five extracellular cadherin repeats, a transmembrane region and a highly conserved cytoplasmic tail. This gene is located in a gene in a region on the long arm of thomosome ls that is involved in loss of heterozygosity events in breast and prostate cancer. In addition, aberrant expression of this protein is observed in cervical adenocarcinomas. Mutations in this gene are associated with hypotrichosis with juvenile macular dystrophy and ectodermal dysplasia, ectrodactyly, and macular dystrophy syndrome (EEMS). [provided by RefSeq, Nov 2015] Background
