Cat. No. DMC100472P

PRODUCT INFORMATION

Warning: Undefined variable shasAttributeValueDescription in Cs\www.root\wirror.dimablo.com\wp-content\plugins\woocommerce-print-products\public.php on line 2806 bMC472 Clone ID

EK8; HEK8; SEK; TYRO1 Synonyme

Host Species Rabbit

PE-conjugated Anti-EPHA4 antibody(DMC472); IgG1 Chimeric mAb Description

Delivery Under Development

Uniprot ID

IgG type Rabbit/Human Fc chimeric IgG1

Clonality Monoclonal Reactivity Human Flow Cyt Applications Recommended Dilutions Flow Cyt 1:100

Purification Purified from cell culture supernatant by affinity chromatography

Formulation & Reconstitution Liquid PBS with 0.05% Proclin300, 1% BSA

Storage & Shipping

Store at 2°C-8°C for 6 months

This gene belongs to the ephrin receptor subfamily of the protein-tyrosine kinase family. EPH and EPH-related receptors have been implicated in mediating developmental events; particularly in the nervous system. Receptors in the EPH subfamily typically have a single kinase domain and an extracellular region containing of sys-rich domain and 2 fibronecth type III repeats. The ephrin receptors are divide into 2 groups based on the similarity of their extracellular domain sequences and their affinities for binding ephrin-A and ephrin-B ligands. Multiple transcript variants encoding different solorms have been found for this gene, iprovided by MeFEes; jan 2013. Background

Usage Research use only

Conjugate

, rotein seq. Research use unity
PE-conjugated
All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is prohibited. We are actively scrutinizing all patent application to ensure no IP infringement. DIMA Disclaimer
