Cat. No. DMC100282P

PRODUCT INFORMATION

Warning: Undefined variable ShasAttributeValueDescription in C:\www.root\mirror.dimablo.com\wp-content\plugins\woocommerce-print-products\public\class-woocommerce-print-products-public.php on line 2806 bMC282 Clone ID

II 11RΔ

IL-11 R alpha;IL-11 RA;IL11RA;Interleukin-11 receptor subunit alpha;IL-11 receptor subunit alpha;IL-11R subunit alpha;IL-11R-alpha Synonyme

Host Species

PE-conjugated Anti-IL11RA antibody(DMC282); IgG1 Chimeric mAb Description

Delivery Under Development

Uniprot ID Q14626 lgG type Rabbit/Human Fc chimeric IgG1

Clonality Monoclonal Reactivity Human Flow Cyt Applications Recommended Dilutions Flow Cyt 1:100

Purification Purified from cell culture supernatant by affinity chromatography

Formulation & Reconstitution Liquid PBS with 0.05% Proclin300, 1% BSA

Storage & Shipping Store at 2°C-8°C for 6 months

Acting solutions for this gene.

Acting solutions of the sequencing or reverse. Interleukin 11 is a stromat cell-derived cyrokine that belongs to a family of plaiotropic and redundant cyrokines that use the gn.130 transducing suburit in their high affinity receptors. This gene encodes the IL.11 receptor which is a member of the host propopel cyrokine receptor family. This particular receptor is very similar to clilary neurotrophic factor; since both contain an extracellular region with a 2-domain structure composed of an immunoglobulin-like domain and a cytokine receptor-like domain. Multiple alternatively spliced transcript variants have been found for this gene. Research use only
