Cat. No. DMC100225P

PRODUCT INFORMATION

Warning: Undefined variable \$hasAttributeValueDescription in C:\wwwroot\mirror.dimabio.com\wp-content\plugins\woocommerce-print-products\public\class-woocommerce-print-products-public.php on line 2806 DMC225 Clone ID

II 21R

CD360; IMD56; NILR Synonyme

Host Species Rabbit

PE-conjugated Anti-IL21R antibody(DMC225); IgG1 Chimeric mAb Description

Delivery Under Development

Uniprot ID Q9HBE5

IgG type Rabbit/Human Fc chimeric IgG1

Clonality Monoclonal Reactivity Human Flow Cyt Applications Recommended Dilutions Flow Cyt 1:100

Purification Purified from cell culture supernatant by affinity chromatography

Formulation & Reconstitution Liquid∏PBS with 0.05% Proclin300, 1% BSA

Storage & Shipping Store at 2°C-8°C for 6 months

The protein encoded by this gene is a cytokine receptor for interleukin 21 (IL21). It belongs to the type I cytokine receptors; and has been shown to form a heterodimeric receptor complex with the common gamma-chain; a receptor subunit also shared by the receptors for interleukin 2: 4, 7; 9; and 15. This receptor transduces the growth promoting signal of IL22; and is important for the proliferation and filteritation of T cells; B cells; and natural killer (IK) (cells. The ligand binding of this receptor leads to the activation of multiple downstream signaling molecules; including JAX1; JAX3; STAT1; and transcript variants have been described.

Research use only Background
